***Reasons for Allowance***

1. Claims 1, 3-15, 20 and 22 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claims invention of creating an assurance methodology implemented by a computer processor operating through a network means such that with the initiation of a word sequence by a sender to a predetermined recipient, the predetermined recipient initiates an audible response through the network means such that the computer can process the audible response to determine that it represents the word sequence initiated by the sender and that the audible characteristics match those of the predetermined recipient stored in memory and that further, the computer processor upon determining positive results in both determinations, initiates a certification in the form of the initial word sequence to the sender.

The closest prior art (Fujimoto et al, U.S. Patent 5,893,057) teaches speaker recognition based on voice characteristics but does not teach an assurance methodology confirming that delivery to the predetermined recipient has been achieved. Therefore, the claimed invention improves the assurance of the sender that the predetermined recipient is the recipient of the sender's word sequence.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
